

**I was on the tail end of two marriages, single, with two small children, in debt and really wondering what my life was all about when I had my Epiphany.**

I certainly felt like a royal failure. I knew that things needed to change. I used to go to bed a night with an emptiness inside and it would still be there when I woke up in the morning. I knew that there must be more to life and I knew that I needed to find my purpose..

My working life had begun to take its toll on me. I felt I was neglecting my children and that I was unhappy.

After suffering a melt down, I finally decided to search for ways to find my purpose and to find the Happiness that I had been wanting for so long.

In taking action, I discovered tools to help get me there and someone to help me see what I couldn't see – the tremendous potential to change my life that was already resident within. I needed to find the leader in me, to become the queen of my life. I needed to take control; to take back my power.

I had suffered with self-esteem issues since my childhood, but I am very happy to say those days are well gone!

I want to now share what I have learned with other women and give them the opportunity to become the queen of their own destiny. I am

proof that this process actually works, as I am now focused, happy, confident and excited about my life, intent on creating the lifestyle that I want to live.

I no longer wonder how to be happy or rely on my circumstances or others for my happiness, I create it with the tools that I want to share with you. I can help you to unearth and put to good use the enormous potential that lies within you and by using my Complete System to Health, Wealth and Happiness you too can become the queen of your life and start creating the kind of life you want to live.

My queenly evolution evolved in three main phases: The Unveiling (Coming to terms with the reality of my Life), The Complete Makeover (Preparing and implementing the changes I desired) and The Royal Crowning (Stepping into my queenly role in my life). I invite you to consider your own life. I would love to help you to share in the joy I now experience.

## TESTIMONIALS

“I am 22 years old and run my own personal training business. Before I met Susan I was living each day in routine...as most of us do. I wanted to make changes in my business to make it bigger, better, and more profitable however nothing would ever happen. It wasn't until I started my journey with Susan, where she helped me realize that the change needed to be made within myself first before the business. This in turn brought great growth in my own personal development which reflected greatly on my business allowing me to comfortably take on more clients and earn extra income per week. Thank you for your great words and guidance Susan.”
